

UTL5S Bulldozer Tires

The UTECH UTL5S is a premium L-5 loader and dozer tire pattern with extra deep tread patterns. It is engineered with superb cut resistance, long tread life and enhanced stability and riding comfort in severe applications such as mining and quarrying.

Parts Details Of UTL5S Bulldozer Tires

Extra deep tread and extra deep lugs:

- The extra deep tread offers superb cut and impact resistance, as well as maximum wear capability.
- The extra deep lugs deliver excellent traction.

Architecture enhanced with high tensile steel belt package and solid centerline section for superior impact resistance and higher load capacity:

- The solid centerline section makes it ideal for heavy duty applications, and it takes on heavy load easily and sustains longer wear life in quarrying and mining.
- High tensile steel belt package built-in for better impact and puncture resistance.

Extra heavy sidewall and square shoulder designed for better cut resistance:

- The square shoulder design pushes debris aside and protects the sidewall from cuts and damages.
- Extra heavy sidewall is designed to resist cut and snags.

Spcifications of UTL5S Bulldozer Tires

| Size | Star Rating | TRA Code | Rim | Section width | | Overall Diameter | | Tread Depth | | Load Index & Speed Symbol | Type |
|----------|-------------|----------|-----------|---------------|-----|------------------|------|-------------|----|---------------------------|------|
